

INTRODUCTION TO PALMISTRY

1 Day workshop
28th March, 2010
Numbers Limited

www.thirdeyeworkshops.com

Join Debbie Pike for an interesting and fun day exploring the basics of hand reading. Discover how the shape and size of the hands and fingers can describe a person's character and give you tools to understand yourself and others. Learn how a fundamental understanding of the palm can help you to capitalise on your strengths, and how it may help to overcome your weaknesses. In a short space of time you will begin to understand how the hands are a mirror of our inner and outer selves, and how this can help in determining our potential in life.

The workshop is both theory and 'hands-on', as we will be working practically to apply what has been learned. By the end of the day, everyone should be able to give a basic palm reading. So come and be inspired and discover some of the secrets that lie in the palm of your hands.
